EDUCATION

Bachelor of Technology

Karunya Institute of Technology and Sciences
B.Tech – Artificial Intelligence & Data Science 2025 – 2029

Higher Secondary Education

Sri Chaitanya Techno School, CBSE, 2023 – 2025

SKILLS

- Programming Languages: Python, HTML, CSS, JavaScript
- AI / ML Frameworks: Scikit-learn, OpenRouter API, LLM Integration
- Data & ML Tooling: NumPy, Pandas, Matplotlib
- Generative AI Expertise: Large Language Models (LLMs), Prompt Engineering, AI Chatbot Development
- Tools & Platforms: Git, GitHub, Flask, VS Code
- APIs & Integrations: OpenRouter API, REST APIs, File Conversion APIs

LANGUAGE

- English
- Tamil

CERTIFICATIONS

- ADVANCED PROMPT ENGINEERING WITH CHATGPT-UPGRAD
- PROGRAMMING FUNDAMENTALS using Python – Part 1-Infosys Springboard

SUMMARY

I am an Artificial Intelligence & Data Science undergraduate passionate about building intelligent, real-world software solutions. With hands-on experience in Python, Flask, and machine learning, I have independently developed AI-powered chatbots, predictive models, and full-stack web applications. I am seeking an internship or entry-level role in AI/ML or software development to grow through practical industry experience.

PROJECTS

CodeBuddy – AI Coding Assistant

- Built with Tanglish (Tamil + English) AI coding assistant with 28 unique features including interview simulation, debugging, code optimization, and secure code execution.
- Implemented real-time streaming responses with a 14-model fallback chain for zero-downtime AI availability.
- Added multi-language support (9 Indian languages), real-time collaboration via SocketIO, and a gamified karma/streak system.
- Build with Python, Flask, HTML, JavaScript

DevMind – AI Developer Learning Platform

- Built a unified AI-powered learning platform combining SQL practice, GitHub repo exploration, and algorithm visualization in one app.
- Developed SQLens — a natural language to SQL converter with color-coded clause-by-clause visual breakdown and live query runner.
- Created GitNarrate — pastes any GitHub URL and generates a podcast-style AI audio walkthrough of the repository.
- Built DSAVisualizer — animates 60+ algorithms live with AI narration at each step and speed control.
- Built with React, Vite, Flask, Python, Groq API (free Llama3), SQLite.

TOOLZEN – All-in-One Web Utility App

- Built a feature-rich browser-based utility app with 50+ tools including file converters, compressors, and a QR code designer.
- Designed a QR code generator with 42+ module shapes, 18 eye styles, gradient presets, logo injection, and SVG/PNG export.
- Implemented 50+ file conversion tools covering PDF, Word, Excel, images, JSON, CSV, and more — all 100% in-browser.
- Integrated a Claude-powered AI assistant for real-time chat, file analysis, and summaries directly within the app.
- Built with HTML, CSS, Vanilla JavaScript — zero frameworks, no installation, no server uploads required.
- View this in https://dharani25007-code.github.io/toolzen/

Student Data Management System

- Built a terminal-based CRUD application to manage student academic records with data entry, retrieval, search, and filter functionality.
- Implemented structured data storage using Python file handling to persist student records across sessions.
- Designed a menu-driven interface for easy navigation — add, update, delete, and view student data.
- Built with Python.
